Product data sheet Characteristics

ABL8REM24050

regulated SMPS - 1 or 2-phase - 100..240 V AC - 24 V - 5 A

Main

Phaseo	
Power supply	
Regulated switch mode	
100240 V AC phase to phase, terminal(s): L1-L2 100240 V AC single phase, terminal(s): N-L1 110220 V DC	
24 V DC	
120 W	
Integrated fuse (not interchangeable)	
5 A	
Against overload, protection technology: 1.1 x In Against overvoltage, protection technology: tripping if U > 1.5 x Un Against short-circuits, protection technology: automatic reset Against undervoltage, protection technology: tripping if U < 0.8 x Un	:
050 °C (without) 5060 °C (with derating factor)

Environment

MTBF reliability	104640 H at 110 V AC with MIL-HDBK-217F calculation method 105777 H at 220 V AC with MIL-HDBK-217F calculation method	
Product certifications	RCM EAC KC CCSAus UL	
Standards	UL 508 CSA C22.2 No 60950-1	
Environmental characteristic	EMC conforming to EN 50081-1 EMC conforming to EN 50082-2 EMC conforming to EN 55024 Safety conforming to EN/IEC 60950 Safety conforming to SELV	
IP degree of protection	IP20 conforming to EN/IEC 60529	
Ambient air temperature for storage	-2570 °C	
Relative humidity	095 % without condensation or dripping water	
Overvoltage category	Class II conforming to IEC 60664-1	
Dielectric strength	3000 V between input and ground 3000 V between input and output 500 V between output and ground 500 V between outputs	

Offer Sustainability

Sustainable offer status	Green Premium product	
REACh Regulation	REACh Declaration	
REACh free of SVHC	Yes	
EU RoHS Directive	Pro-active compliance (Product out of EU RoHS legal scope)	

EU RoHS Declaration

Mercury free	Yes
RoHS exemption information	Yes
China RoHS Regulation	China RoHS declaration
Environmental Disclosure	Product Environmental Profile
Circularity Profile	End of Life Information

Regulated Switch Mode Power Supplies

Derating

The ambient temperature is a determining factor that limits the power an electronic power supply can deliver continuously. If the temperature around the electronic components is too high, their life will be significantly reduced.

The nominal ambient temperature for the Optimum range of Phaseo power supplies is 50 °C. Above this temperature, derating is necessary up to a maximum temperature of 60 °C.

The graph below shows the power as a percentage of the nominal power that the power supply can deliver continuously, depending on the ambient temperature.

- X Maximum operating temperature (°C)
- (1) ABL 8REM, ABL 7RP mounted vertically

Derating should be considered in extreme operating conditions:

- Intensive operation (output current permanently close to the nominal current, combined with a high ambient temperature)
- Output voltage set above 24 Vdc (to compensate for line voltage drops, for example)
- Parallel connection to increase the total power
